making technology accessible

Public

Hello and thank you for your interest in learning more about Inspera's stance on accessibility.

For the past 20 years, Inspera has served hundreds of institutions and associations around the globe, and are proud of our ongoing commitment in aligning and complying with internationally recognized accessibility standards. The following document represents a voluntary, independent audit of our current functionality, which will be updated—at least—on an annual basis. However, for larger feature upgrades, Inspera may elect to re-publish updated VPATS on an ad hoc basis to show ongoing and substantial compliance.

As part of ensuring the testing process is accessible and equitable, we make every effort to ensure students, faculty, and administrators with disabilities will have ease of access and use of our platform. To demonstrate this commitment, Inspera has instituted the following internal policies:

- Committed monthly technical development capacity dedicated to improving user accessibility
- Ongoing accessibility best practices training for technical, design, and product staff
- Voluntary submission of our platform capabilities to annual audit by a world class accessibility audit company
- Implemented a direct feedback process for end users that have ideas to improve our accessibility for high visibility and prioritization

We do not want to just "comply" with accessibility, our goal is to lead the industry as an example to other educational technology solution providers.

We invite you to review our most current audit performed by Tech For All who is a leading authority on helping companies ensure their technology is inclusive. For over 20 years, they've been at the forefront of solving the most complex software and hardware inclusion challenges. Tech For All are pioneers who contributed to the creation of Section 508 of the Rehabilitation Amendment Act of 1998. Today, they continue to help organizations identify the applicable standards for their products or services. They provide the technical assessments and guidance necessary to achieve a truly accessible experience for all users. Inspera is proud to partner with Tech For All as leaders in accessibility, and together we are delivering on our goals of equal and equitable access to our solutions.

Inspera Administrator View Accessibility Conformance Report

International Edition

(Based on VPAT® Version 2.5)

Name of Product/Version: Inspera Administrator

Report Date: September 14, 2026

Contact Information: accessibility@inspera.com

Product Description:

Inspera Assessment enables faculty, academics, and administrators to collaborate effectively so that they can spend more of their time crafting assessments and delivering impactful feedback to candidates and less on setup. Use of real world applications and materials allows you to deliver authentic assessments with ease.

Author, design, deliver and grade your assessments and share feedback all within the platform with the familiarity of the same user interface.

Evaluation Methods Used:

The accessibility assessment was comprised of the following steps:

Automated Evaluation:
The pages were tested using the Wave and aXe accessibility testing plugins and used the Chrome Inspector to review the code for further irregularities which may affect users with disabilities.

Manual Evaluation:
Manual Evaluation is essential to identify and analyze the accessibility issues and violations that automatic tools either do not identify or identify incorrectly (false positives). Manual evaluations were performed according to the following high-level protocol:

I. Keyboard accessibility analysis (for mobility and physically impaired users) was conducted by attempting to thoroughly navigate the course through the keyboard, without using a mouse.

II. For deaf and hard of hearing users, any audio content was assessed for proper captioning.

III. The accessibility for low vision users was evaluated three ways: (1) using the resizing capability offered by the browser; (2) applying text spacing adjustments using a bookmarklet; and (3) testing color contrast of text and non-text elements using a combination of automated tools, code inspection and Colour Contrast Analyser (CCA) Version 3.5.1.

IV. Screen reader testing was conducted by an expert screen reader user. The goal was to identify accessibility barriers that are likely to be experienced by screen reader users who are blind. The evaluator worked through the web page using all of the test environments listed above.

V. Cognitive diverse user needs were evaluated for understandable layout, predictable navigation, support for finding content and assistance.

Use Case - the following pages/functional elements have been evaluated:

- Sign in, profile management, and forgot password flow.
- Create a new question set (BETA / Author > Create new > New Author — including all question types and exploring sections).
- Explore the top-right menu icons (Notifications, Settings, and Help).

Applicable Standards/Guidelines

This report covers the degree of conformance for the following accessibility standard/guidelines:

Terms

The terms used in the Conformance Level information are defined as follows:

- **Supports**: The functionality of the product has at least one method that meets the criterion without known defects or meets with equivalent facilitation.
- **Partially Supports**: Some functionality of the product does not meet the criterion.
- **Does Not Support**: The majority of product functionality does not meet the criterion.
- **Not Applicable**: The criterion is not relevant to the product.
- **Not Evaluated**: The product has not been evaluated against the criterion. This can only be used in WCAG Level AAA criteria.

WCAG 2.x Report

Tables 1 and 2 also document conformance with:

- EN 301 549: Chapter 9 - Web, Sections 10.1-10.4 of Chapter 10 - Non-Web documents, and Sections 11.1-11.4 and 11.8.2 of Chapter 11 - Non-Web Software (open and closed functionality), and Sections 12.1.2 and 12.2.4 of Chapter 12 – Documentation
- Revised Section 508: Chapter 5 – 501.1 Scope, 504.2 Content Creation or Editing, and Chapter 6 – 602.3 Electronic Support Documentation.

Note: When reporting on conformance with the WCAG 2.x Success Criteria, they are scoped for full pages, complete processes, and accessibility-supported ways of using technology as documented in the WCAG 2.0 Conformance Requirements.
